

EN54-24:2008  
XXXX -CPD-XXXX

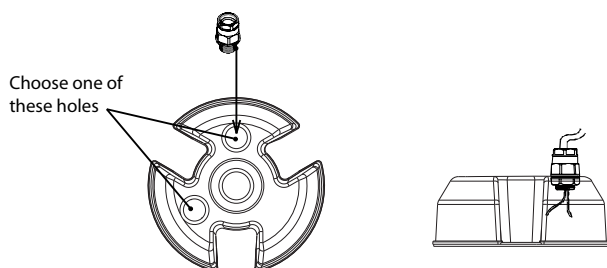

TYPE A

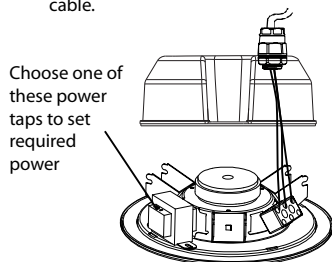

1) Cut the 155 mm diameter hole in the ceiling.

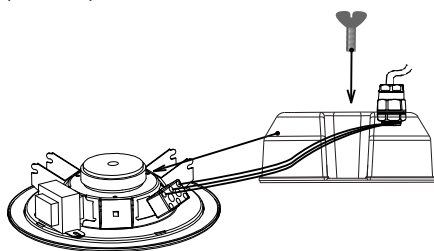

2) Unscrew bolt and remove dome.

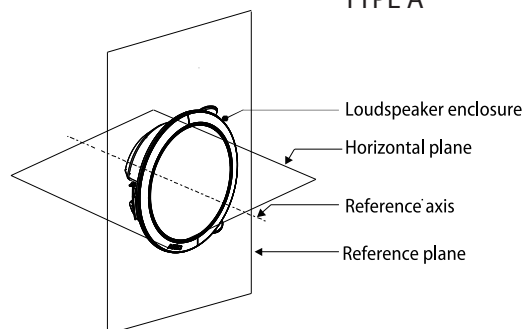

3) Mount the cable gland and pass through it the cable.

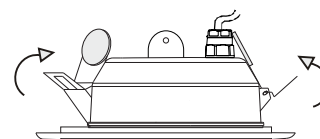

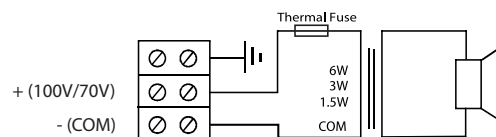

4) Connect cable with ceramic terminal and set required power output on the line transformer.

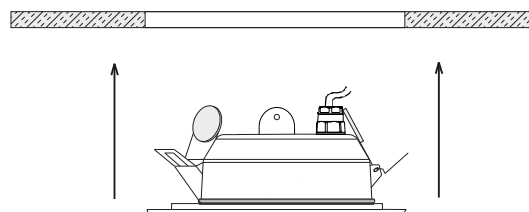

5) Place the dome on the loudspeaker and fix it with the screw.

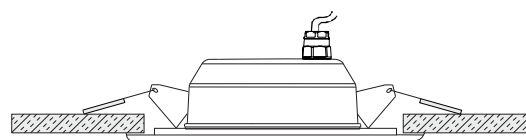

## MC 4EN Circuit diagram

6) Lift all speaker's mounting clamps.

7) Carefully push loudspeaker into the hole, until the springs fix it.
