

CAMERA SOUNDBAR  
**V-Complete 4K Camera Soundbar**  
 V-Complete 4K Camera

# V-Complete 4K

V-Complete 4K is a combination of UltraHD image quality video camera with a powerful soundbar, that can be used as all-in-one solution for online conferencing or education purposes. Low noise image sensor and autofocus lens ensure the clear view even in dim-light or contrasty environments. Video camera utilizes intelligent software for face detection and automatic framing of participants. When a device recognizes one meeting participant speaking, it automatically moves the lens, focuses on the face and shifts its microphone pick-up beam towards the speaker for a clear and isolated voice. Setting up V-Meet 4K can be as easy as plugging power and USB cables. Although designed for fully-automated operation (suitable for most users), the device provides plenty of manual controls that can be accessed with included IR remote control. Device also supports ePTZ and mechanical PTZ (MPT) field of view controls.

Technical Specifications	V-Complete 4K
<b>CAMERA HARDWARE</b>	
Video output	4K UHD @ 30fps and lower resolutions
Lens	121° Viewing angle
Zoom	5x digital zoom
Intelligent features	Auto-framing, wide dynamic range optimization, 2D and 3D noise suppression
Control options	Ir remote control (included), supports ePTZ, mechanical PTZ (MPT) field of view movement
<b>AUDIO HARDWARE</b>	
Input	Built-in beam forming microphone
Working distance	6 m
External mic	Can be used with external omnidirectional mic (sold separately)
Output	Full range speakers
Bluetooth	Soundbar can function as Bluetooth speaker
<b>OTHER INFORMATION</b>	
Connections	1x USB 3.0 Type C, 1x USB 2.0 Type A
Power input	12 V DC
Weight	2.5 kg

External V-Cmic omnidirectional microphone (sold separately).
